

## 3-Phase Electronic motor contactor 15A IC-Electronic.....

SMC 3 DOL has been developed for cranes and other harsh applications where inching, jogging and plugging is frequently used and where a high number of operating cycles are essential. In such applications the lifetime of the equipment is normally limited by the short lifetime of the electromechanical contactor.

### Type SMC 3 DOL:

- ◆ Rated operational voltage up to 600VAC 50/60 Hz
- ◆ Rated operational current up to 15A, AC-53 and AC-4
- ◆ Compact modular design 45mm
- ◆ Control voltage: 24-60VDC or 24-480VAC
- ◆ High number of start/stop operations / hour
- ◆ Meets IEC 947-4-2 requirements
- ◆ All data are reported at ambient 40 °C and 100% load
- ◆ IP 20 Protection
- ◆ LED status indication

IC-Electronic's electronic contactors are today used in many industrial applications including in the plastics, food and packaging industry, where there is a need for many and frequent operations.

The special semiconductor allows a very long life time ( up to 50 mill. cycles).

Contactors can be mounted side by side. For DIN rail or directly to the mounting plate.
