Cleanroom® 100 Cleanroom® 100 Sterile

Cleanroom® 100 and
Cleanroom® 100 Sterile
wipes are the complete
solution for critical
environments

The Critical Solution.

Critical environments require advanced and reliable cleaning solutions. Cleanroom® 100 and Cleanroom® 100 Sterile wipes provide these solutions in every aspect, making them ideal for use in critical production processes, including semi-conductors, pharmaceuticals, biotechnology and all other environments where contamination is a possibility.

Containing low levels of ions and organic extractables, Cleanroom® 100 wipes meet ISO class 5, and are gamma-irradiated in order to eliminate bacteria and sterilize the product. Each carton bears an irradiation sticker to notify the customer of the proper dosing range, confirmed by a sterilization certificate enclosed in each carton.

- Solvent resistant – Allows you to use the best solvent for the task
- Excellent absorption – Removes fluids quickly and completely
- Very low lint – Low impact of fiber shedding
- Superior strength, wet and dry – Does not tear in use
- Low extractables – Dirt is retained in the wipe
- Durable double sealed packaging – Reliable, maintains sterility
- Gamma-sterilized – Free from bacteria

Cleanroom 100: the clean wipe for a clean environment.

Art. No.	Size (cm)	Colour	Content	Prod. Type	Dispenser
