FOR ACTIVE USE

**NEW POLARIZED YELLOW LENS**

**EMERALD GREEN MIRROR COATING**

Wiley X Europe is now introducing our brand new Polarized Yellow lens and the colorful Emerald Mirror coating option for prescription lenses. The two options, combined will give the possibility to create the perfect prescription lens for open water sport activities.

These models are often preferred by fishermen and people doing water sports in general, because the polarized technology eliminates the light reflections from the water surface. Furthermore, the yellow lens enhances the contrast and gives a perfect vision, whether it is sunny or cloudy. Wiley X also recommends yellow lenses for cycling, shooting, golf and driving.

A yellow tinted lens under an emerald green multi-coat mirror surface that's specially designed to amplify color contrast and deliver high visual definition. Distinct colors and crisp acuity in all light conditions for superior vision performance.

Your local optician is now ready to help you find the frame witch fits you best and meets your requirements to your activity. You can find your nearest optician by following this link: [www.wileyx.eu](http://www.wileyx.eu)
