## NEW SABER ADVANCED LENS COLORS PERFECT FOR SPORTING AND HUNTING

Saber Advanced is the newest within Wiley X's Tactical Series, and the model has set new standards for ballistic eyewear with a 3 mm polycarbonate lens – the first of its kind.

Saber Advanced has an adjustable nosepiece and adjustable temples (length), in fact it is possible to completely remove the temples and replace them with an elastic head band.

Another feature is the changeable lenses, allowing you to change lenses depending on the weather conditions. Saber Advanced is available with one, two or three lenses in five different colors. Wiley X offers two brand new lens colors to the Saber Advanced, the Yellow and the Vermillion.

These new featured lens colors and the design of the frame is the reason why this model is perfect for sporting and hunting.

The Saber Advanced can also be delivered with prescription lenses, through a newly developed RX insert system.
