PRODUCT FOCUS AUGUST - SEPTEMBER 2011

SABER ADVANCED

The Wiley X Saber Advanced meets the tough specifications for protective eyewear in both Northern America and Europe. It has a solid 3.0mm thick polycarbonate lens — the thickest, most durable lens available in the tactical eyewear market. With

the Saber Advanced you are guaranteed a lens for every challenge — the model comes as standard with 1, 2 or 3 changeable lenses, but you can choose from a total of 5 different lens colors. So whether you are riding your bike or shooting clay pigeons, you are firmly covered with the Saber Advanced and the premium Wiley X contrast lenses.

The Saber Advanced has an Ultra Foam Brow Bar to keep sweat and debris off your face, and a well-engineered design providing wrap-around protection that delivers powerful, battlefield-tested impact resistance and 100% UVA and UVB protection.

By removing the temples and replacing them with the rugged elastic strap, you can reduce pressure on the head under a helmet and ensure a secure fit.

The Wiley X Saber Advanced has an optional RX plug-in available to seamlessly fit most prescriptions, and has a tailored 'take flight' nose piece to adapt to a wide range of nose shapes and sizes — so it stays right in place when the heat is on.

So get ready for the upcoming duck & geese hunting season or enter one of this fall's many sport activities wearing the Saber Advanced.
