Wiley X® produces the new Blaser® F3 shooting eyewear

Wiley X® Eyewear Europe is proud to announce that Blaser® have selected Wiley X to design and produce the new Blaser® F3 shooting eyewear.

Wiley X® and Blaser® have conducted internal tests on fit and function, and basically made one of the best shooting glasses available on the market today.

The release date for the Blaser® F3 shooting eyewear will be mid June 2011.

Based on the correct arms control knowledge and experience in shooting the eyewear design now meets all requirements to enhance the shooters performances and in the same time giving him the best possible ballistic protection, all in the same shooting glasses.

Wiley X use the lens material polycarbonate, which over the last years has improved to be even better in optic and protection, and the improvement develops every day.

Wiley X® supplies protective eyewear to military and law enforcements all over the world. The lenses are always produced in polycarbonate, because after several testing sessions with materials such as NXT and Trivex, NXT & Trivex proved that they cannot hold and will not give the same protection in the combat zone or on the shooting field.

To enhance the users experience with the shooting glasses, Wiley X® is one of the only eyewear manufactures in the world to design the lenses with prism controlled technology. This means that the lens is developed and manufactured with different lens thickness in the same lens to optimize the lens distortions to an absolute minimum.

The laboratory testing that Wiley X® has on the Blaser® F3 special Saber edition shooting glasses also contains the European norm EN.166 F among many others. This EN.166 test also includes the strong optical distortion test, which Wiley X® passes with high recognition.

Wiley X® is proud of being chosen by Blaser® to design and produce the shooting glasses to their high class assortment, which they offer to their end-users all over the world.

Wiley X® cannot promise you better results when shooting - but we can promise you that you are now protected with the best on the market.
