

Remote Reading

The Tallybee System

The Market's Most Reliable and User-friendly System for Remote Reading of Power Meters...

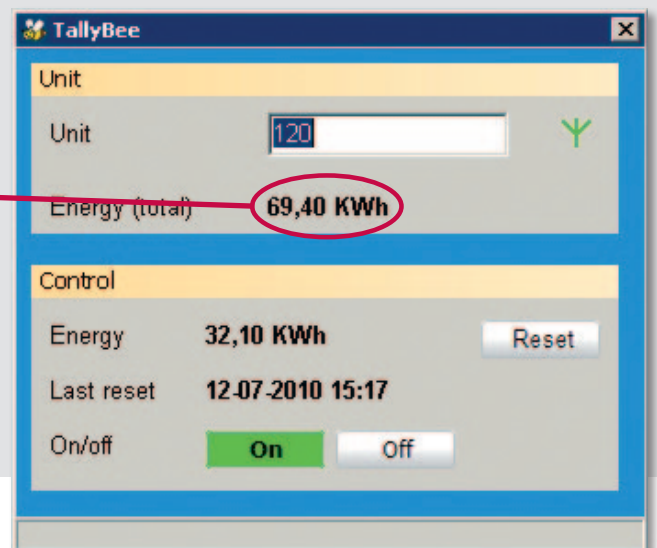

Tallybee makes it possible to read power meters on your computer, and it only takes a moment. Open the tallybee pop-up window, type in the meter number and read the consumption!

This is How it Works:

- Upon arrival, the guest chooses a spot, connects the cable, and is able to use power during the stay.
- At departure, the tallyBee pop-up window is opened, and the power consumption is read.
- The outlet is reset and ready for the next guest.
- It is also possible to turn the power outlet on and off with a single mouse click.

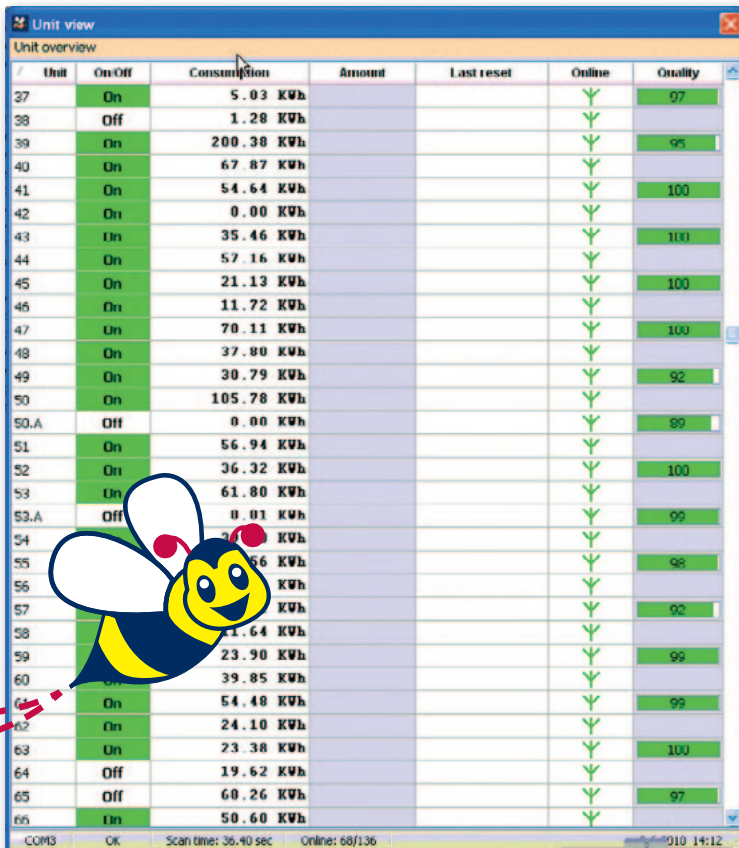

(The on/off function requires an optional relay).

This screen shows the dedicated tallybee software. When integrated with tallymaster or tallymanager, the reading looks differently!

Unit	On/Off	Consumption	Amount	Last reset	Online	Quality
37	On	5.03 kWh			Y	97
38	Off	1.28 kWh			Y	
39	On	200.38 kWh			Y	95
40	On	67.87 kWh			Y	
41	On	54.64 kWh			Y	100
42	On	0.00 kWh			Y	
43	On	35.46 kWh			Y	100
44	On	57.16 kWh			Y	
45	On	21.13 kWh			Y	100
46	On	11.72 kWh			Y	
47	On	70.11 kWh			Y	100
48	On	37.80 kWh			Y	
49	On	30.79 kWh			Y	92
50	On	105.78 kWh			Y	
50.A	Off	0.00 kWh			Y	99
51	On	56.94 kWh			Y	
52	On	36.32 kWh			Y	100
53	On	61.80 kWh			Y	
53.A	Off	0.01 kWh			Y	99
54	On	23.00 kWh			Y	
55	On	56.66 kWh			Y	98
56	On	1.64 kWh			Y	
57	On	1.64 kWh			Y	92
58	On	1.64 kWh			Y	
59	On	23.90 kWh			Y	99
60	On	39.85 kWh			Y	
61	On	54.48 kWh			Y	99
62	On	24.10 kWh			Y	
63	On	23.38 kWh			Y	100
64	Off	19.62 kWh			Y	
65	Off	60.26 kWh			Y	97
66	On	50.60 kWh			Y	

Reliability

The tallybee radio units communicates with each other continuously, finding the optimal route for transferring information between the outlets and the computer - thus ensuring a steady data connection.

This means that all the data in the system are up to date at any given time.

Extended Warranty

Tallykey backs up every tallybee-system with an extended 2-year warranty on a correct and reliable function of the system!

The outlet overview gives you all the relevant information in a matter of seconds!

Data Security

The tallybee system automatically performs data backup, and all the information is stored in the computer as well as in the system itself. This is why data-loss is not an issue, not even at power failures. The system automatically regenerates as soon as the power comes back!

Easy Installation

Tallybee is a wireless system, so there is no need for signal cables.

The only things needed are radio units installed at each power outlet and a master radio with an antenna in the office - and the system is ready to run!

Tallybee is for Everybody...

You do not need to have tallykey supply pedestals or software to use tallybee!

The system works with most types of power meters, and the dedicated tallybee software will run independent of other software.

Tallybee can be used side by side with other software. This being said, we naturally recommend our tallykey supply pedestals for their unique design and durability.

Highly recommended are also our user friendly harbour and campsite management software solutions **tallymaster** og **tallymanager**.
