Superior exudate management and continuous release of ibuprofen

Biatain Ibu Foam Dressing

www.biatain.coloplast.com
Biatain Ibu is unique as it combines superior exudate management with continuous release of ibuprofen during the entire wear time of the dressing\(^1,2\).

Biatain Ibu foam dressings provide superior moist wound healing and may reduce wound pain caused by tissue damage\(^1,3,4\), offering high patient comfort due to a soft and flexible foam dressing with bevelled edges\(^5\).

**Mode of action**

A unique foam dressing with local release of ibuprofen\(^1,2\)

The ibuprofen is evenly distributed in the foam at 0.5 mg/cm\(^2\). When the dressing is applied, ibuprofen is released continuously, depending on the amount of exudate from the wound.

The release of ibuprofen from Biatain Ibu is exudate driven. In the presence of exudate the ibuprofen is continuously released throughout the entire wear time both when applied to high and low/medium exuding wounds\(^1,3,4,6\).

**Indications**

Biatain Ibu foam dressings are indicated for a wide range of exuding wounds including leg ulcers, pressure ulcers and non-infected diabetic foot ulcers.

Biatain Ibu foam dressings may be used for second-degree burns, donor sites, postoperative wounds and skin abrasions.

Biatain Ibu foam dressings may be used throughout the healing process in the presence of exudate to provide protection for the indicated types of wounds.

Biatain Ibu foam dressings provide moist wound healing and may reduce wound pain caused by tissue damage\(^1,3,4\).

Biatain Ibu foam dressings are suitable for use in combination with compression therapy.

**Assortment**

The Biatain Ibu range offers solutions for most exuding wounds.

**Biatain Ibu Non-adhesive Foam Dressing**

Is a soft and non-adherent foam, suitable even if surrounding skin is fragile or injured.

**Biatain Ibu Soft-Hold Foam Dressing**

Is suitable for difficult to dress wounds.
