

The Move represents the evolution from the popular Prima 2.0 model. The brand new hydroformed 6000 series alloy front triangle has polygonal cross section top tube and a hexagonal cross section down tube, to ensure confident handling and rigidity.

Also new is the C-HS1 headset system and the fork, made specifically to work together with the new headset to improve manoeuvrability and steering precision.

Technical size

Size	Ps	Os	Pccs	Scs	Sc°	A	C	Hs	P	O
