

Sydney 5th December 2003

To whom it may concern,

Letter of recommendation

In July 2003, Colby Powder Systems Pty. Ltd. (www.colbypowder.com) employed Toxvig Rustfri A/S, to undertake the installation of our milk powder transport, storage and blending plant at Arla Foods Arinco site in Videbæk, Denmark.

At the peak of the installation, Toxvig Rustfri A/S employed 13 mechanical fitters and stainless steel welders on site. This large project was completed on schedule on the 1st December 2003, largely due to the professionalism of Toxvig Rustfri A/S supervisors and site crew.

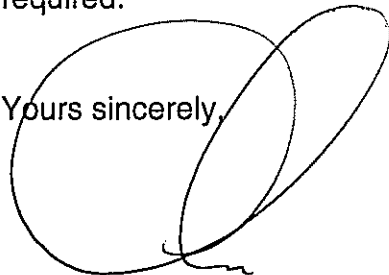

It should also be noted that the site team at all times was backed up by a very professional office and management team.

Toxvig Rustfri A/S has been an excellent company to work with and their workmanship is of the highest quality. Toxvig Rustfri A/S have proven themselves to be very organised and honest in their dealings, - on all levels.

Colby Powder Systems can highly recommend Toxvig Rustfri A/S to provide a complete package for the mechanical installation of dairy plants and equipment, locally or internationally.

Please do not hesitate to call the undersigned if additional information is required.

Yours sincerely,

A handwritten signature in black ink, appearing to be "Otto Nielsen", written over a large, loopy scribble.

Otto Nielsen
Senior Project Manager

Joe O'Donoghue
Site Manager
