Re.: General adjustment of prices as per January 2017

2016 ended up as a reasonably busy year with respect to activity level.

As for prices in general we have now come to a point where a base price adjustment is inevitable.

Be assured that we will manage this adjustment to be as considerate as possible.

Further to this raw material prices for producing Tasso cast iron bar products have fluctuated more than 35% during 2016 and are pointing upwards, so be prepared for a further price adjustment in the months to come.

Raw material prices are based on statistics from Bundesverband der Deutschen Giesserei-Industrie (BDG) published by Committee Of Associations Of European Foundries (CAEF).

<http://www.caef.org/downloads/kategorie.asp?kat=8>

Hoping to have served you with this information we look forward to supply you with high quality Tasso cast iron bar products in raw and semi-machined condition also in 2017.

Best regards

TASSO A/S – Cast Iron Bar Specialist
