WILEY X® EYEWEAR MODELS PROVIDE HUNTERS, SHOOTERS AND MILITARY TROOPS ACROSS THE GLOBE WITH CLEAR VISION AND ULTIMATE PROTECTION.

As a leading provider of eyewear products to the U.S. military as well as many other countries in the World, Wiley X®, Inc. has built a reputation for absolute premium protection. Hunters, competitive shooters and gun enthusiasts of all kinds will benefit from this same reputation, thanks to a full roster of shatterproof Wiley X sunglasses developed for the shooting, military and outdoor life.

Among the many Wiley X models engineered for the military as well as for hunters and shooters are members of the company's innovative Changeable Series — glasses that combine sharp visual acuity, military-grade eye protection and the flexibility to change out multiple lens options to match specific conditions and shooting/hunting situations.

The Wiley X Saber Advanced is designed for shooting sports and other tactical situations. For example, it is specially designed for use with hearing protection. The sturdy temple arms remove quickly, and can be replaced with a snap-in elastic strap to both reduce pressure on the sides of the head and ensure a secure fit during heavy action. This lightweight design also features an Ultra Foam™ Brow Bar to keep sweat and debris off your face, dual injected non-slip adjustable temples and a tailored nose piece that adjusts to various size noses for a secure, comfortable fit.

Wiley X's Saber Advanced Changeable Series model is an affordable (with retail price from just €44,50), versatile choice for shooters and hunters designed for Medium, Large or Extra Large head sizes. It is offered with subtle Matte Black frames and a variety of premium lens options — including Pale Yellow, Light Rust, Smoke Grey, Clear and Vermillion — to match any conditions or shooting activities.

All these Changeable Series models are built to the highest standards, meeting stringent EN.166F, ANSI Z87.1 High Velocity and High Mass Impact Safety standards as well as the updated MIL-PRF-32432 (GL) MCEP Standard (superseding the GL-PD 10-12 MCEP Standard) for combat protective eyewear. This level of proven protection is a key reason why Wiley X is a top eyewear choice for law enforcement and other tactical applications, in addition to military users around the globe.

In addition to advanced impact protection, Wiley X's lenses also provide 100% UVA and UVB protection.

For more information on Wiley X's full line of performance protective eyewear for tactical use, hunting, shooting, and the great outdoors – please visit the Wiley X stand 320 in Hall 6 and www.wileyx.eu
