**Certificate of compliance with regulations for board in contact with food**

Customer: Stora Enso Ingerois Oy  
Product: Tambrite

We have obtained from the producer detailed information concerning raw materials and additives. Based on our investigations, we consider the above board to comply with the following regulations in terms of its chemical composition:

- European Parliament and Council Regulation (EC) 1935/2004/EC
- European Parliament and Council Directive 94/62/EC (amendment 2004/12/EEC)
- Commission Regulation (EC) No 2023/2006
- Law concerning the revision of the foodstuffs and animal feed legislation of updated version 1 March 2008, §§ 30 and 31, Germany
- BfR recommendation no. XXXVI, 1 June 2007, Germany  
*With limitations: In terms of its chemical composition, the board grade represented by the samples tested is suitable as packaging material both dry and non-fatty foods as well as moist and fatty foods, provided that in the latter case only the back surface is in direct contact with food.*
- FDA regulations, 21 CFR, parts 170-189, 1 April 2008, USA  
*With limitations: In terms of its chemical composition, the board grade represented by the samples tested is suitable as packaging material for dry foods and aqueous and fatty food grades I, II, IV-B, VI and VII-B, which are listed in Table 21 CFR 176.170 ©.*
- EN 13432:2001, Annex A. Table A.1. (Packaging. Requirements for packaging recoverable through composting and biodegradation.)
- EN 71-3:1994/A1:2000 Safety of toys. Migration of certain elements
- EN 71-9:2005 Safety of toys. Organic chemical compounds

Samples of the board were tested sensorically. The results indicate that the boards tested are not inclined to bring about a deterioration in the organoleptic characteristics of food being in contact with the board. In terms of its microbiological properties, the material is suitable for use in contact with foodstuffs.
