

Conformity Declaration

Product: **RINCEL SXS FILM** (BOPP – Biaxially Oriented Polypropylene Film)

Date: 01/05/2011

Version 2

The **Rincel SXS** film is produced with raw materials that comply with:

- ✓ The **Regulation (EC) No 1935/2004** of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food.
- ✓ The **Commission Regulation (EU) No 10/2011** of 14 January 2011 on plastic materials and articles to come into contact with food.
- ✓ The **Commission Regulation (EC) No 1895/2005** of 18 November 2005 on the restriction of use of certain epoxy derivatives in materials and articles intended to come into contact with food.
- ✓ The European Parliament and Council **Directive 94/62/EC** of 20 December 1994 on packaging and packaging waste.

This product is manufactured according to the requirements of **Commission Regulation (EC) No 2023/2006** of 22 December 2006 on good manufacturing practice for materials and articles intended to come into contact with food.

According to the information provided by the raw materials suppliers, available till the present moment, some grades that can be used in the production of the **Rincel SXS** film may contain the following substances subject to SML:

Ref. No	CAS No	Name	Restrictions and/or specifications
38840	154862-43-8	Bis(2,4-dicumylphenyl)pentaerythritol-diphosphite	SML = 5 mg/kg (as sum of the substance itself, its oxidised form bis(2,4-dicumylphenyl) pentaerythritolphosphate and its hydrolysis product (2,4-dicumylphenol)).
74880	000084-74-2	Phthalic acid, dibutyl ester	(b) technical support agent in polyolefines in concentrations up to 0,05 % in the final product. SML = 0,3 mg/kg food simulant.
39090	--	N,N-Bis(2-hydroxyethyl)alkyl(C8-C18)amine	SML = 1,2mg/kg
68320	002082-79-3	Octadecyl-3-83,5-di-tert-butyl-4-hydroxyphenyl)propionat	SML = 6 mg/kg
92560	038613-77-3	Tetrakis(2,4-di-tert-butylphenyl)-4,4'-biphenylene diphosphonite	SML = 18mg/kg
38820	026741-53-7	Bis(2,4-di-tert-butylphenyl) pentaerythritol diphosphite	SML = 0,6 mg/kg
--	--	A stabilizer for which a SML value has been established.	Testing of the specific migration on the finished article is not necessary up to a thickness of 1mm, because the limiting value cannot be exceeded at a 100% rate (worst case calculation).

Conformity Declaration

Product: **RINCEL SXS FILM** (BOPP – Biaxially Oriented Polypropylene Film)

Date: 01/05/2011

Version 2

According to the information provided by the raw materials suppliers, available till the present moment, some grades that can be used in the production of the **Rincel SXS** film may contain the following “dual use” substance: calcium stearate, silica, mono/diglycerides of fatty acids (Ref. 56486).

The **Rincel SXS** 20, 25, 28, 35, 40 and 50µm, were analyzed by an independent laboratory. These tests certify that the above mentioned films comply with the Directive 2002/72/EC and its amendments in terms of the overall migration limit of 10mg/dm² for the following food simulants and test conditions:

- Isooctane, 24 hours at 40°C
- Acetic acid 3%, 10days at 40°C
- Ethanol 10%, 10 days at 40°C

We remind you that, in accordance with the Commission Regulation (EU) No 10/2011, the migration shall be measured from the finished food contact articles using real food or the appropriate food simulants at the real time/temperature conditions of use.

It is the customer's responsibility to test our products in order to satisfy itself as to the suitability of the products for the customer's particular purpose. This declaration only refers to the films in their original form, as supplied by Casfil and does not extend to subsequent modifications.

This declaration shall continue in effect for 1 year from its issue date.
