

This specification describes articles of the material group

Palm leaf

Material description:

The products are made out of discarded palm leaf cuts of the Adaka nut palm in India by a family business. The palm leaf cuts used are the remnants of the palms which normally rot on the ground. They are collected, cleaned with fresh well water, laid into a water bath and are mechanically pressed into a mould at 120 °C. The pressure process per individual piece lasts 45 to 90 seconds, depending on the size. No other additives are required for lamination etc. The post-drying process occurs in a oven heated with wood charcoal. Then the products are wrapped in film and cartons. Each article is unique and has its own structure.

	<p>Plate round Article numbers 5031, 5033, 5037, 5039, 5041</p>
	<p>Plate square Article numbers 5030, 5040</p>
	<p>Plate hexagonal Article numbers 5032, 5038</p>
	<p>Bowl rectangular Article numbers 5034</p>
	<p>Punch bowl Article numbers 5035, 5036</p>

	<p>Tray Article numbers N745</p>
	<p>Boat small Article numbers 10758</p>
	<p>Bowl deep Article numbers 10759</p>
	<p>Ellipse 2-compartment Article numbers 10760</p>
	<p>Trigon bowl Article numbers 12172</p>
	<p>Triangle Article numbers 12173</p>

This information is based on our current level of know-how and knowledge. Specifications can be adjusted at any time without advance warning.

Production location: India

Characteristics: The product is impermeable to oil, water.
However, only suitable as disposable dishes and not for food packaging (except for dry products)

Heat resistance: to 220°C
Temperature-safe in: Microwave oven
Regular oven to 220°C
Freezability: to -25°C

Bio-degradability: The products are completely bio-degradable:

Certificates: Tested according to DIN EN 13432
Certificate no. 7P0058

Special regulations: These articles are suitable for direct contact with food according to test report SQTS 2012L45373 and comply with EU-regulation 2006/2023 regarding Good Manufacturing Practice.

Customs duty number: 4419.0000
