

Qufora® IrriSedo Cone

For high volume transanal irrigation

Description

Qufora IrriSedo Cone includes:

- A.** 1500 ml water bag, connected to a tube with a valve and a pump
- B.** Single-use cone with hydrophilic coating that is activated when dipped in water

Accessories

Single-use cones

Features

- The soft single-use cone is coated so when dipped in water it is ready to use straight away
- The cone is single-packed in a pouch that can be used to attach and detach the cone hygienically, which can also be used as a disposal bag for the used cone
- The water can be inserted either by gravity or by using the manual pump
- The manual pump has a non-return valve that prevents used water from running back in the pump

Shelf life

5 years from production

Disposal

Qufora IrriSedo Cone does not require special disposal protocols and may be disposed of in household waste according to local guidelines and recommendations

Classification and sterilization

Qufora IrriSedo Cone is a Class I Device, non-sterile

Regulations and standards:

- MDR (Regulation 2017/745) – CE
- UK MDR 2002 – UKCA
- ISO 13485:2016 (certified)

Qufora IrriSedo Cone

Hydrophilic coated cone
Single-use cone is ready to use when dipped in water
