

Qufora® IrriSedo Mini

For low volume transanal irrigation

Description

Qufora IrriSedo Mini includes:

- A.** Single-use cone with hydrophilic coating that is activated when dipped in water
- B.** Pump

Accessories

Single-use cones

Extension tube

Features

- The soft single-use cone is coated so when dipped in water the surface becomes lubricated and it is ready to use straight away
- The cone is single-packed in a pouch that can be used to attach and detach the cone hygienically, which can also be used as a disposal bag for the used cone
- The procedure can be performed using only one hand
- The manual pump has a non-return valve that prevents used water from running back in the pump
- If a little extra water is needed, or using both hands is preferred, a single-use extension tube is available

Shelf life

5 years from production

Disposal

Qufora IrriSedo Mini does not require special disposal protocols and may be disposed of in household waste according to local guidelines and recommendations

Classification and sterilization

Qufora IrriSedo Mini is a Class I Device, non-sterile

Regulations and standards:

- MDR (Regulation 2017/745) - CE
- UK MDR 2002 - UKCA
- ISO 13485:2016 (certified)
