# Eyewear protection at its Peak

Protective-eyewear specialist Wiley X has added another Active Series model in three versions to suit a range of outdoor activities.

The latest offering from Wiley X should provide outdoor enthusiasts and sunglasses wearers of all types with a bold new choice when it comes to crystal-clear vision and state-of-the-art eye protection.

This newest member of the popular Active Series family – the WX Peak – comes in three Rx-ready versions, each with frame/lens colours paired to deliver good looks, sharp, distraction-free vision and, most importantly, Wiley X's battlefield-proven protection during any outdoor activity.

#### INTO THE ACTION

As the name implies, Wiley X's Active Series frames are built for action with lightweight yet nearly indestructible construction and a secure, comfortable fit thanks to

soft rubberised nose bridges and/or temple gloves.

Whichever new WX Peak model people choose, they will benefit from all-day wearing comfort and 100 per cent protection against the sun's damaging rays.

In addition, WX Peak shades are certified to EN.166 as well as ANSI Z87.1-2010 High Velocity and High Mass Impact Safety standards, providing OSHA-grade protection against a wide range of dangers encountered in the great outdoors.

Wiley X is the only major sunglasses brand with this level of protection in every adult style it offers, a key reason why it is a leading provider of protective eyewear for the US military, law enforcement, elite professional anglers and others who perform in challenging conditions.

One version (non-polarising) of the WX Peak pairs a classic gloss black frame with distinctive Silver Flash lenses for a cool-as-ice look that can go anywhere.

With its versatile grey tint and stylish looks, this is perfect for a wide range of activities on the job, out on the town or in the outdoors.

The firm also offers two versions of the WX Peak that feature its Filter 8 polarising lenses, which combine eight unique layers of lens technology.

One version matches a unique gloss-layered tortoiseshell frame with polarising amber lenses for a look designed to stand out in a crowd.

The glare-cutting properties of these advanced lenses make them perfect for wearing on the water, on the road or in any high-glare environment.

The third WX Peak features an understated matt-black frame outfitted with polarising blue mirror lenses. The tint, reflective surface and glare-reducing properties of these lenses make them ideal for fishing, helping anglers 'read' the water, locate fish-holding structure and target fish by sight in the shallows and flats.

They are also great for general boating and water sports, as well as driving, bicycling and other outdoor sports.

Like almost all Wiley X eyewear styles, the new WX Peak is Rx-ready, making it an ideal, no compromise choice for active people who require corrective lenses.
