REACH Compliance Statement

April 2023

Tasso supports the objective of REACH (Registration, Evaluation, Authorisation and restriction of Chemicals, 1907/2006/EC) to further improve the European Union's chemicals regulatory system, including the aim to advance public health and safety as well as the protection of the environment.

Tasso is a manufacturer and distributor of cast iron bars and semi-machined products hereof. All ingredients are sourced from within EU/EEA.

As of the date of this memo, none of the products sold by Tasso, to our current knowledge, contain substances at concentrations above the legal threshold that are included on the Candidate List of substances of very high concern for Authorisation (SVHC substances); as published on the ECHA website as of June 10th 2022.

The REACH regulation does not require that Tasso provides analysis data for our products. However, where relevant we will on a case-by-case basis consider appropriate testing and reporting of analyses subject to agreement with respective customers or authorities.

We trust that the above will satisfy your inquiry into Tasso's compliance with REACH. In case you have any questions please contact your sales representative.

Best regards,

Ashkan Rezagholi

Metallurgist & Foundry Engineer, Tasso A/S
