.....
Customer name

We hereby confirm that our suppliers does not intentionally add raw materials containing the Fluoride Components during their manufacturing process for paper, glues and ink. We do not expect to find it in our packing materials.

This means that, under normal and foreseeable conditions of use, the paper , glue, inks does not transfer any constituents to food with which it is like to be in contact. In quantities which could:

- endanger human health
- bring about an unacceptable change in the composition of the food
- bring about a deterioration in the organoleptic characteristic thereof.
