5. NIAS

Potentially present NIAS (impurities, degradation- and reaction-products), were investigated via á GC/MS-screening. In case NIAS were detectable, consumer safety was ascertained by internationally accepted principles for risk-assessment.

6. Information about MOSH / MOAH, SML and Dual use

This product does not contain any mineral oil components.

This product does not contain monomers, additives or components which have SMLs or QMAs as specified by Regulation 10/2011/EC.

Dual use additives are not intentionally used for production of this product.

Concerning the examination of the suitability (migration) of these materials for the direct contact with food the user of these packaging materials is responsible.

Kind regards
FORUMPLAST GmbH
