

**FARMfill® Premium  
Biofyld**

**Safety Data Sheet**

**1. Company information**

- 1.1 Identity: **FARMfill®-PREMIUM  
Biofyld**
- 1.2 Manufacturer: Greenway-Denmark Aps  
Bolundvej 7, Tolne  
DK-9870 Sindal  
+45 98 46 15 55

**2. Composition / Information on ingredients**

- 2.1 Components: Maize grit, Water, herbal extractions patented  
manufacturing method

**3. Alternative risks**

- 3.1 Hazards identification: inflammable
- 3.2 Special risks for humans and environment: none

**4. First aid measures**

The product is not toxic and needs no specific measures  
If someone gets dust in his eyes only flush them with water.  
General information about medical treatment is not necessary.

**5. Fire fighting measures**

- 5.1 all certified extinguishing agents are permitted
- 5.2 special risks: none
- 5.3 special safety equipment: none

**6. Accidental release measures**

- 6.1 Personal precautionary measure: escape route, keep away from ignition  
sources
- 6.2 Measures for environmental protection: none
- 6.3 Measure for cleaning / collecting: none

**7. Handling and storage**

- 7.1 Handling: no specific demands
- 7.2 Storage: protect from solar radiation, store in dry conditions

**8. Exposure controls/personal protection**

No specific precautions necessary

## **9. Physical and chemical properties**

- 9.1 Form:                      cylindric  
9.2 Colour:                   white  
9.3 Odour:                    none  
9.4 Other:                    The product is comparable with damped wood with an humidity about 20%

## **10. Stability and reactivity**

- 10.1 conditions to be avoided:                      directly contact with water  
10.2 dangerous reactions:                           none  
10.3 dangerous decomposition products:            none

## **11. Toxicological information**

The product is absolutely not toxic.

## **12. Ecological information**

This product is without stint biodegradable. The burning of this product is not a problem because it needs only so much oxygen during burning which it produced while it grows. It behaves CO<sub>2</sub>-neutral.

## **13. Disposal considerations**

- 13.1 Advice:                      The product should be composted.

## **14. Transport information**

FARMfill® products are not dangerous products in according to the international regulations for transport and storage classifies. These products do not underlie any import/export restrictions.

## **15. Regulatory Information**

FARMfill® products are not dangerous classified and do not underlie any restrictions.

## **16. Other information**

None

These statements describe exclusively the security requirements of the product and rely after best knowledge on the current state of our knowledge.
