## Lumocolor 97% - Responsibility for the Environment

In 2023, STAEDTLER will launch the transition of our Lumocolor assortment, within the 31- range, to recycle materials. This means that the housing (barrel, cap, and end cap) on models 311, 312, 313, 314, 315, 316, 317, 318, and 319 will no longer be made of brand-new plastic.

Instead, they will be made of 97% recycled plastic (recycled polypropylene). Only the optimum quality of raw materials has been selected for this transition. Therefore, despite this change, the updated product will still reflect the traditional Lumocolor quality!

Thank you for joining us in our effort to reduce our CO2 emissions and make a positive impact.

For any inquiries, questions or concerns regarding this upgrade please contact your local sales representative. For customer service please contact [info.nc@staedtler.com](mailto:info.nc@staedtler.com).
