

CT5 TIME TO GO

CT5 TIME TO GO

BATTERY CHARGER & MAINTAINER

TAKE CONTROL OF YOUR TIME

Start to get ahead when you have control over your car's time. Finding time for car maintenance can prove difficult, especially when you don't have a lot of time to get things done. Up until now, this has been the case for battery charging. It's not until you have a car that can charge your car's battery that you can get things done. The CT5 Time to Go charger does this for you, allowing you to take control and plan your day, by accurately predicting when it's charging time.

GETTING FULL PICTURE

The CT5 Time to Go charger takes a different approach to battery charging - it tells you when your battery will be ready for use. A series of LED lights indicate the different charging stages and how long it will take before the battery is charged and ready to go. There are also indicators that tell you when you can safely start your vehicle and when the battery is ready to go.

IMPROVE BATTERY PERFORMANCE

The CT5 Time to Go charger has three key charging and maintenance stages to make sure the power and the time of the battery - it can even revive a discharged battery that has become inert. Easy to use and fully automatic, the CT5 Time to Go charger uses advanced technology to constantly monitor the battery's power and how it should take actions when required. It can be attached to the battery indefinitely if required without risk of over or under charging.

TIME TO GO - WHEN YOU'RE READY

The CT5 Time to Go charger is the first charger in the world to tell you exactly when your battery will be recharged and ready to go. A series of LED lights indicate the different charging stages, a red hour long (in hours) your battery has to go before it's charged.

Countdown to ready-charged, in hours:

-  8h Less than a hour until ready-charged
-  4h Approx. 4 hours until ready-charged
-  2h Approx. 2 hours until ready-charged
-  1h Approx. 1 hour until ready-charged

Works on all car lead-acid batteries.
